**Exhibition Press Release:
The Snow Show**

The Snow Show explores the issues related to Art and Architectural investigation by creating works from the ephemeral materials of snow and ice. An artist was partnered with an architect and invited to develop a work together—this conversation created a bridged between the art and architectural worlds.

Conceived in 2000 by independent curator Lance Fung, The Snow Show has since constructed seventeen structures that furthered the discussion of interdisciplinary collaboration and set the tone for the current Snow Show. This year, the artists and architects have created interactive experiences inspired by the dramatic natural beauty of Sestriere and the athletic competitions of the Olympics.

We hope you enjoy the exhibition and it encourages you to learn more about contemporary art and architecture.
